

THE CITY OF SAN DIEGO **MANAGER'S REPORT**

DATE ISSUED: August 21, 2001

REPORT NO: 01-178

ATTENTION: Honorable Mayor and City Council

SUBJECT: Appointment of Metropolitan Wastewater Department Director

SUMMARY

THIS IS AN INFORMATION ITEM ONLY. NO ACTION IS REQUIRED ON THE PART OF THE CITY COUNCIL.

I am pleased to announce the appointment of Scott Tulloch as Director of the Metropolitan Wastewater Department effective August 20, 2001. Scott has worked for the City for 7 years, most recently as Acting Director, and for the year prior to that as Acting Assistant Director. From 1994 to 2000 he led a \$1.5 billion Capital Improvement Program to upgrade and expand the Metropolitan Sewerage System as the Deputy Director of the Engineering and Program Management Division in the Metropolitan Wastewater Department.

Prior to working for the City, Scott completed a distinguished career in the U.S. Army Corps of Engineers. He completed a variety of assignments in troop and engineering organizations, culminating in Deputy Commander and Commander positions in Germany and throughout the United States. He has a Bachelor of Science Degree in Civil Engineering from the Citadel, a Master of Science Degree in Civil Engineering from the University of Texas at Austin, and a Master of Arts Degree from the U.S. Naval War College. He is a registered Professional Civil Engineer in California.

When he isn't working on the City's goal to reduce sewage spills, Scott spends time with his wife, Karen, at their ranch in the Deerhorn Valley area southeast of Jamul. They are just completing construction of a new home there, which, as Scott tells his three grown daughters, has plenty of room for grandchildren.

Respectfully submitted,

George I. Loveland
Senior Deputy City Manager
